Education

ABES Engineering College, Ghaziabad

2024 – 2028

Bachelor of Technology in Computer Science Engineering

Till Semester:4th

CGPA: 7.83/10.0

Professional Summary

Computer Science Engineering student with hands-on experience in full-stack web development using React.js, Node.js, Express.js, and MySQL. Built real-time and AI-powered applications while strengthening problem-solving skills through 250+ DSA problems. Seeking a Software Engineering or Full-Stack Development Internship to apply technical skills and contribute to impactful projects.

Projects

Real-Time Chat Application [GitHub](#)

React.js, Node.js, MySQL, Socket.IO, JWT

- Architected and developed a full-stack real-time messaging platform with secure JWT-based authentication and role-based access control.
- Implemented Socket.IO-powered bidirectional communication achieving sub-100ms message delivery latency.
- Built advanced real-time features including typing indicators, online user tracking, read receipts, image sharing, and voice messaging.

AI-Powered Task Management System [GitHub](#)

React.js, Node.js, MySQL, GPT-4o API

- Developed an AI-driven productivity platform integrating GPT-4o for task generation, prioritization, subtask creation, and daily summaries.
- Designed secure authentication and role-based task management workflows.
- Implemented scalable MVC architecture with optimized database operations maintaining API response times below 200ms.
- Built interactive dashboards providing productivity insights and project progress analytics.
- Reduced manual planning effort by automating task creation and scheduling workflows.

Real-Time Transaction Analytics Dashboard [GitHub](#)

React.js, Node.js, Express.js, MySQL

- Developed a real-time transaction monitoring platform delivering live analytical insights through Socket.IO event streaming.
- Implemented fraud detection logic to identify suspicious high-value transactions using aggregation queries.
- Built scalable RESTful APIs following MVC architecture principles and optimized database performance using indexing strategies.
- Created advanced filtering and visualization modules enabling faster business decision-making and self-service analytics.

Technical Skills

- Programming Languages:** C++, C, Python, JavaScript (ES6+), TypeScript
- Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Vite
- Backend:** Node.js, Express.js, REST APIs, Socket.IO, JWT Authentication
- Databases:** MySQL, PostgreSQL, Sequelize ORM
- Developer Tools:** Git, GitHub, Postman, VS Code
- Core Concepts:** Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks, MVC Architecture, WebSockets
- Additional Skills:** AI API Integration, Prompt Engineering, Query Optimization, Authentication & Authorization

Achievements

- Solved 250+ Data Structures and Algorithms problems across LeetCode, GeeksforGeeks, and HackerRank.
- Built and deployed multiple full-stack applications involving real-time communication, AI integration, and analytics systems.
- Developed production-grade applications using React.js, Node.js, MySQL, Socket.IO, and REST APIs.

Certifications

- Python Essentials 1 – Cisco Networking Academy
- Python Essentials 2 – Cisco Networking Academy
- JavaScript Intermediate Certification
